

10 Inputs High-side or Low-side 00-00622-100/110 PMC 10 Channel Input Module

PMC Input Modules 100 and 110 are members of Intellitec's Programmable Multiplex Control family. They work in combination with the PMC CPU and other standard, semi-custom or custom I/O modules.

There are ten input connections for rocker, limit, or sensor switches. Each individual input can be configured as either a switch to ground, or a switch to battery. All input information is directly communicated to the CPU via the PMC communications link. The CPU utilizes this information to control other PMC output modules. All of the output harnesses are connected with AMP Mate-N-Lok connectors to reduce installation time and errors.

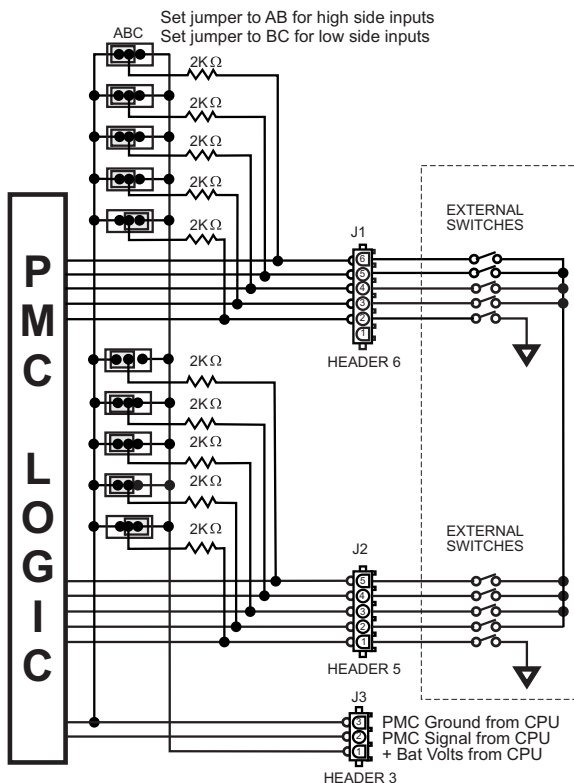

The approximate module dimensions are 6.375" X 3.750" X 1.875" (16.2mm X 9.5mm X 4.8mm). The module should be installed in a protected environment inside of the vehicle.

To reduce wiring and if your panel switches are grouped together, you may consider using Intellitec's standard switch adapters, custom adapters or custom switch panels. Several standard switch adapters are available.

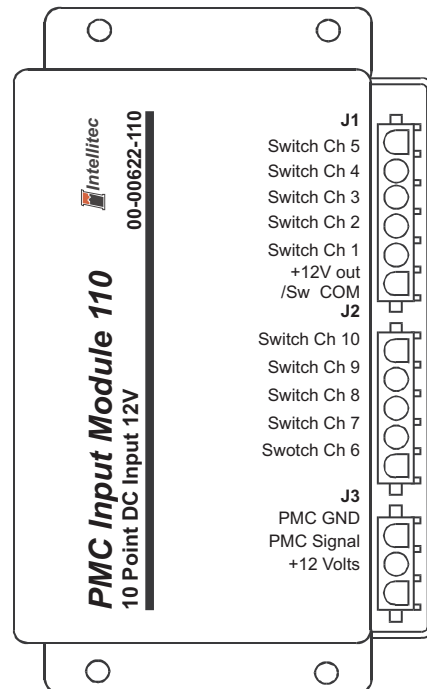

Pat. No. 4,907,222 & 6,011,997

Rocker switches can be plugged directly into these adapters which plug into the PMC Multiplex bus. This eliminates the wiring between standard rocker switches and the 100/110 PMC I/O module.
