

Battery Guard[®]

Intelligent Battery Disconnect Kits

US Patent # 4,628,289

The Battery Guard[®] line of intelligent battery disconnects are a proven solution for preventing dead batteries in your vehicle. The system works by monitoring the voltage levels of your batteries, disconnecting them when the system senses low voltage, saving your battery for operation as well as preventing against damage. Learn about the features offered across our line of smart battery disconnect kits.
