

Capacitive Touch Keypads (Road Commander)

Part number: 00-01137-000

00-01138-000 00-01140-000 00-01141-000

Description:

Intellitec's Road Commander Capacitive Touch Keypad line offers a sleek modern look to the market. Utilizing a patent pending concept of using rare-earth magnets for mounting, these keypads do not require exposed fasterners creating an edge to edge smooth surface. The Capacitive Touch Line is offered in 4 configurations, 4, 6, 8, 10 button. The keypads can be mounted vertical or horizontally.

The Capacitive Touch Keypads use a windows based User Interface configuration tool that is simple to use. The integrator can choose between a number of pre-defined functions by selecting the drop down box for each input. Keypads can also be preconfigured and printed with custom artowrk selected by the integrator or end user. Each input has a backlight which indicates the status of the function defined. Input definition determines what functions the input controls/reports a status about and will automatically determine if that input needs to be momentary or latching.

The Capacitive Touch Keypads communicate via CANbus utilitizing the Road Commander protocol. The physical connectors used for communicating on the CAN network and provides power and ground to the device are 6-pin MiniFit connectors with the pin definitions listed in the table below:

<u>Pin</u>	<u>Description</u> CAN H		
2			
3	CAN L		
5	GND		
6	PWR		

PRODUCT SPECIFICATION

53-01137-001

Product Features:

- Patent Pending Magnetic Mounting
- Capacitive touch single surface
- No Framing necessary
- Hidden fasteners for seamless look
- Backlight indication
- Factory customizable icons
- Background can be offered in solid colors or textured color patterns to match vehicle interior

Environmental Specifications:

Operating temp: -20/50 deg C (-24/122 deg F) Storage temp: -40/85 deg C (-40/185 deg F)

Intrusion Rating: None Agency approvals: None

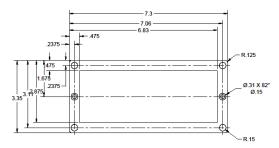

Electrical Specifications:

	Unit	Min	Тур	Max
Operating supply voltage	V	9	12/24	30
Reverse supply voltage	V	-30		
Quiescent Current Draw	mA		13	
Operating Current Draw	mA	13	10 per LED active	130

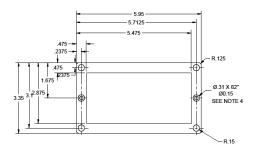

Dimension Specifications:

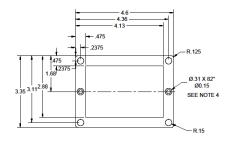

Listed below is the mounting bracket information. Which is fastened to the surface with two countersink screws. The capacitive touch overlay sits flush with the mounting back on all four sides matching the over dimensions provided. Note, provided illustrations are not to scale.

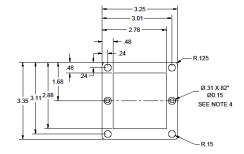

00-01137-000 - Capacitive Touch 10 Input

00-01138-000 - Capacitive Touch 8 Input

00-01140-000 - Capacitive Touch 6 Input

00-01141-000 - Capacitive Touch 4 Input
